

Millimeter wave absorbing sheet

Thin, lightweight, highly absorbent radio wave absorber

- High absorption better 20dB*
- Thickness 0.8mm**
- Specific gravity 1.1
- High durability for automotive use

*Free Space method S11<-20dB

**For 76-81GHz

Features

Soft

With adhesive

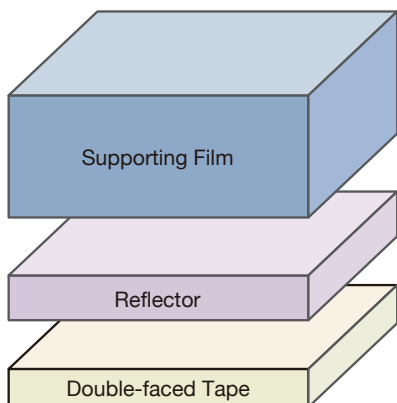

Free Design

Flexible

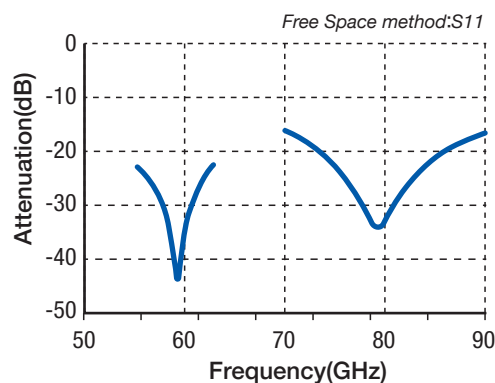

Structure

Without double-faced tape can be supplied.

Attenuation performance

Frequency range are 20-100 G

Product Lines

Adjustable to specified frequency

*With Double-sided tape

Frequency	Type	Thickness*
24GHz	ZCF-SRA-0240	2.1mm
60GHz	ZCF-SRA-0600	1.0mm
79GHz	ZCF-SRA-0790	0.8mm
